WORK EXPERIENCE

Web Developer Intern

BHARATINTERN

08/2023 - 08/2023

Achievements/Tasks

- Design the UI of the Websites and Developed the full responsive Websites.
- Led the design and development of a Netflix homepage clone using **ReactJS**, **HTML**, and **CSS**.
- Contributed to the implementation of interactive features, such as contact forms and dynamic content, to enhance user engagement.
- Leveraged ReactJS and its hooks, including **useState** for managing component state and **useEffect** for handling side effects

Web Developer Intern

LetsGrowMore

08/2023 - 08/2023

Achievements/Tasks

- Spearheaded the development of a minor web project independently, showcasing self-initiative and a strong grasp of web development principles.
- Deployed the project to a live environment, providing accessible and interactive content.
- Utilized **ReactJS** for a dynamic and interactive interface, ensuring smooth navigation and seamless transitions between sections

REACTJS

Responsive design

PERSONAL PROJECTS

Netflix Home Page clone (08/2023 - 08/2023)

- Designed and Developed a full-fledged clone of the **Netflix** homepage using **ReactJS**.
- I painstakingly recreated the Netflix homepage's layout, colors, typography, and overall aesthetic using **HTML** for the structure and **CSS** for styling.
- I incorporated interactive features like hover effects, clickable elements, and modal dialogs to mimic the behavior of the original Netflix homepage.

Portfolio Website (08/2023 - 08/2023)

- I designed and developed a dynamic **Portfolio** website using **Reactjs**.
- On hovering over project images, users can easily access project details and links, allowing them to explore my work in more detail.
- I provided a prominent button that allows visitors to download my CV directly.
- I incorporated social media icons that link to my profiles on various platforms.
- Responsive Portfolio Website and eye-catching color animations throughout the website.

E-Commerce Website (08/2023 - Present)

- Independently designed and developed **E-Commerce** Platform using **ReactJS**.
- Integrated Routers and **Bootstrap**'s carousel component to dynamically display featured and popular products on the homepage.
- Implemented a categorized product catalog.
- Designed a dynamic shopping cart where users can view their selected products, adjust quantities, and see real-time price updates. This cart also features a checkout button for a seamless transaction process.
- Implemented a wishlist feature that allows users to save products for later, user-friendly login and signup pages.
- Included social contact information for easy communication and customer support.
